

# How to use ZERUST<sup>®</sup> Rust Inhibiting Coatings

**Wear correct protective gear and gloves.  
Start with a clean and dry part.**

**Thoroughly and evenly coat the metal surface**

Note that not all methods are suitable for some products.  
See product information sheet for specifics.

**Immersion and dip**

Immerse for 30 seconds for water-based products

**Spray**

**Brush, roll, or wipe on**

**Drip or hang-dry part until no dripping  
liquid is noted.**

**Keep your part clean and rust free during shipping or storage  
with additional protection from ZERUST<sup>®</sup> ICT<sup>®</sup> VCI Packaging.**
